

SCRIPT FROM A HOSPITAL

Is there any priority or emergency traffic before we begin the scheduled Hospital Net?

[PAUSE]

Good Evening! This is [CALL], [NAME], Net Control Station for the scheduled monthly Santa Clara County Hospital Net on the N6NFI repeater, 145.230 MHz, negative offset with a PL of 100Hz.

This net meets on the 4th Wednesday of each month at 1900 hours local time for the purpose of training and to verify operation of amateur radio equipment installed at each local hospital.

[PAUSE]

This net is normally conducted from the Santa Clara County Public Health Department Emergency Operations Center or DEOC, but tonight [YOUR HOSPITAL] is conducting the net. The tactical call sign for this station is [YOUR HOSPITAL]. My call is [CALL].

[PAUSE]

I will now conduct a roll call of the district hospitals. Please respond with your tactical call – that is, the name of your hospital – Your amateur call sign and first name. Please identify any other amateur operators on station with you tonight. Indicate if you are NOT using hospital installed equipment. We would like you to send a packet message to the Tactical call, 1HDEOC, at the KF6ZSQ-4 BBS on 144.950. And finally, indicate if you have traffic for the net.

[Read specific instructions for this evenings net, if any]

[Go to hospital roll call sheet – next page]

This concludes the polling of the hospitals. This is [CALL]. [PAUSE]

I will now take traffic from those hospitals indicating they had traffic for the DOC.
[Refer to poll list – call each in order and handle any traffic]

Are there any late or missed hospitals that wish to check in? Go now, please.

Is there any other business for the net at this time? [PAUSE]

Thank you for your participation in the Monthly Hospital Net. We will now return the repeater to normal, general purpose, use. Our thanks to the owners and operators for use of the repeater this evening.

Good Evening, this is [CALL], [NAME] closing the monthly hospital net for [MONTH].
